a. Consult your directory for the correct listing of the subscriber you wish to call.

b. Dial the digit eight (8) and wait for the second dial tone. (Note: After dialing the digit 8, a two or more seconds delay will occur before the second dial tone will be heard, this is because the switching center equipment is searching for a tandem circuit that is not busy. If after dialing 8 and busy tone is heard, hang up your receiver and try again later as all the circuits are busy).

c. After hearing the second dial tone, dial the seven digit number of the desired party. Area Code prefix (three digits) plus the extension number (four digits). (Note: After dialing is completed, a several seconds delay will occur before ringing is heard. If a busy tone is heard, hang up your receiver and try again as the number you dialed is busy). Do not attempt to speed dial, allow the dial to return back to its proper place under its own momentum otherwise numbers will not register properly at the distant exchange.

FOR EXAMPLE: A subscriber at Da Nang wishes to call a subscriber at Tan Son Nhut Air Base in the Saigon area. The Da Nang subscriber would dial 8-924-2167 and would be connected directly to the subscriber at Tan Son Nhut with the extension number 2167.
