

Charles Penley purchased the “Attack On Tan Son Nhut, Saigon, Vietnam, Battle Map, dated Dec 4-5, 1966, from the National Archives.

The scan above is only a portion of that map.

Please use the “ + and - “ icons on the .pdf above and you will be able to enlarge and shrink the map a considerable amount.

Toward the bottom of the map, you will see where I placed a red circle around one of the black circles. This particular black circle has “13 and K” written inside this circle.

This is the location of the 13 dead enemy bodies that were less than 100 feet from Delta Bunker-11.

Delta Bunker-11 was slightly south of the red circle.

Delta Bunker-11 was being manned by:

A2C Robert Valentine, bunker NCOIC and assistant M-60 gunner. He is the holder of the Bronze Star Medal for his actions that night.

A2C Alvin W. Curie, M-60 gunner. He is the holder of the Silver Star Medal for his actions that night.

A3C John P. Walker, M-16 gunner. He is the holder of the Bronze Star Medal for his actions that night.

Below the red circle is the numbers: 040110 – 040430.

That is Dec 4, 1966, 0110 hours – Dec 4, 1966, 0430 hours.

The lines shows you the direction of travel of the enemy.

The circles with a “ K ” inside them, is where an enemy body lies.

TF-35 = Task Force-35 element. They were positioned in four different locations.
